

Tips for Wearing PPE with Religious and Cultural Attire

Note: Terms in bold are defined in the **Definitions** section. If you have any questions or comments contact IPC at ipcsurvstdadmin@ahs.ca.

Best practice recommendations

Purpose

- To outline considerations for healthcare workers wearing eye protection and/or procedure masks (ear loops)/surgical masks (ties at the back of head), or N95 respirators, and maintaining/respecting religious head wear or attire, e.g., **turban**, **kippah**, **hijab**, **niqab**, **kapp**, or **head scarf**.

Application

This recommendation should be followed by all AHS staff, medical staff, midwives, volunteers, students and other persons acting on behalf of AHS.

1. Mask and eye protection

- 1.1 Wear mask and eye protection** (e.g., goggles, face shields, visors attached to masks) according to an [infection prevention and control \(IPC\) risk assessment](#), additional precautions in place ([isolation pocket reference](#)) and [resource manual](#) for specific disease conditions.
- 1.2 A face shield is the preferred eye protection to wear with religious attire.
- 1.3 Follow [donning](#) and [doffing](#) posters for detailed PPE steps, including hand hygiene.
- 1.4 For specific questions (not addressed in this information sheet) about how to wear masks and religious head coverings, contact the WHS Advisor in your zone.

2. Wearing procedure/surgical masks or N95 respirators with religious attire

- 2.1 Determine which procedure/surgical mask is appropriate for use with religious attire.
 - a) Procedure mask can be donned using ear loops under religious attire (refer to Figure 1); **or**
 - b) A mask extender or surgical mask with ties can be donned over religious attire. (refer to Figure 2).
 - c) If using a mask extender, find an angle that does not pull the mask too far up or down.
 - d) Refer to [Tips on the Use of Mask Extenders](#) for details.

Tips for Wearing PPE with Religious and Cultural Attire | 2

- 2.2 Perform N95 respirator fit testing with head covering in place to ensure the wearer can get an effective fit/seal. The N95 must be secured over the head cover.
- 2.3 When a niqāb is worn, decide if the mask or N95 respirator is sufficient face covering or if the niqāb will be worn over the mask.
- a) If a niqāb is worn over the mask or N95 respirator:
- Have a supply of additional niqāb to change as needed.
 - When leaving a room on additional precautions:
 - Doff any additional personal protective equipment (PPE) at the designated doffing area, except for procedure/surgical mask or N95 respirator under niqāb.
 - In a convenient private change space and immediately before any other tasks:
 - Remove the niqāb;
 - Doff procedure/surgical mask or N95 respirator.
- 2.4 When to change procedure/surgical mask, N95 respirator, religious attire and face shield:
- a) Procedure/surgical mask or N95 respirator is changed if wet, soiled or contaminated, e.g., Aerosol Generated Medical Procedure (AGMP) exposure, after leaving an additional precautions room, being cough or sneezed on, and before breaks and shift change.
- b) Perform an [IPC risk assessment](#) and change religious attire anytime contamination by splashing/sprays/touching is suspected.
- c) If procedure/surgical mask, N95 respirator or face shield becomes contaminated, change as a unit with religious attire.

3. Laundering head coverings

- 3.1 Launder head and face coverings regularly e.g., daily. Refer to [IPC's Healthcare Attire \(Scrubs and Uniforms\) Information Sheet](#) for details.
